A scramjet (supersonic combustion ramjet) is a variant of a ramjet airbreathing jet engine in which combustion takes place in supersonic airflow. As in ramjets, a scramjet relies on high vehicle speed to compress the incoming air forcefully before combustion (hence ramjet), but whereas a ramjet decelerates the air to subsonic velocities before combustion, the airflow in a scramjet is supersonic ...

3D computer graphics or three-dimensional computer graphics (in contrast to 2D computer graphics), are graphics that use a three-dimensional representation of geometric data (often Cartesian) that is stored in the computer for the purposes of performing calculations and rendering 2D images. Such images may be stored for viewing later or displayed in real-time.

Sensible heat. The first class called sensible heat uses the specific heat capacity to store thermal energy. Unfortunately, because the specific heat capacity of most materials is generally of two orders of magnitude lower than its latent heat, sensible heat storage is obsolete in a thermal management system.

Executive Summary. Many proclaim that the days of the internal combustion engine are numbered because of emerging "zero-emissions vehicle" (ZEV) technologies, especially battery-powered electric vehicles, which supposedly offer better performance, lower cost, and, most important, "emissions-free" driving.
