Computational neuroscience (also known as theoretical neuroscience or mathematical neuroscience) is a branch of neuroscience which employs mathematical models, theoretical analysis and abstractions of the brain to understand the principles that govern the development, structure, physiology and cognitive abilities of the nervous system. ...

Computational neuroscience - Wikipedia

A computational model is a mathematical model in computational science that requires extensive computational resources to study the behavior of a complex system by computer simulation.. The system under study is often a complex nonlinear system for which simple, intuitive analytical solutions are not readily available. Rather than deriving a mathematical analytical solution to the problem ...

This mini-symposium aims to provide a forum for specialists in reactive gas mixtures modeling and simulation, to identify and discuss, express and publish their expert views on current research, challenges in, and possible solutions for modeling of non-equilibrium processes, as well as developing the novel analytical and numerical methods for corresponding problems simulation, and address ...
