Emergent Cosmology. Authors: Alexandre Harvey-Tremblay Comments: 38 Pages. In this work, we aim to unify statistical physics with relativity. As such, we construct a system of statistical physics under an appropriate equilibrium condition such that its Lagrange multipliers imply, instead of the usual uniform constant temperature, a uniform constant speed: the speed of light.

In mathematics and physics, a tensor field assigns a tensor to each point of a mathematical space (typically a Euclidean space or manifold). Tensor fields are used in differential geometry, algebraic geometry, general relativity, in the analysis of stress and strain in materials, and in numerous applications in the physical sciences. As a tensor is a generalization of a scalar (a pure number ...

In physical cosmology, cosmic inflation, cosmological inflation, or just inflation, is a theory of exponential expansion of space in the early universe. The inflationary epoch lasted from  $10^{-36}$  seconds after the conjectured Big Bang singularity to sometime between  $10^{-33}$  and  $10^{-32}$  seconds after the singularity. Following the inflationary period, the universe continues to expand, but at ...
